(c) were produced by or on behalf of the producer of the goods being valued;

that one is the sole agent, sole distributor or sole concessionaire, however described, of the other are taken to be related if they fall within the criteria of subclause (2).

(4) For the purposes of this Schedule, persons are taken to be members of the same family if:

(a) they are connected by blood relationship within the fourth degree of relationship;  
or

For the purposes of this Schedule, charges for interest under a financing arrangement entered into by a buyer and relating to the purchase of imported goods are not to be regarded as part of the customs value of the goods if:

(a) the charges are distinguished from the price actually paid or payable for the goods;  
and

(b) such goods are actually sold at the price declared as the price actually paid or payable; and

(c) the buyer, if required, can demonstrate that:

(i) the financing arrangement was made in writing; and

(ii) the claimed rate of interest does not exceed the level for such transactions prevailing in the country where, and at the time when, the finance was provided.

(8) For the purposes of this Schedule, information submitted by an importer, buyer or producer in relation to valuing imported goods may not be rejected by the Director of Customs because of the accounting method by which the information was prepared if it was prepared in accordance with generally accepted accounting principles.

In the interpretation of this Schedule, regard must be had to:

the Interpretative Notes in Annex 1 to the Agreement on Implementation of Article VII

of the General Agreement on Tariffs and Trade 1994; and

the decision of 26 April 1984 on the Treatment of Interest Charges in the Customs Value of Imported Goods that was adopted by the WTO Committee on Customs Valuation on 12 May 1995; and

(c) the decision of 24 September 1984 on the Valuation of Carrier Media Bearing Software for Data Processing Equipment that was adopted by the WTO Committee on Customs Valuation on 12 May 1995.

## **2. Application**

(1) The provisions of this Schedule apply to any goods imported into Vanuatu on or after the date specified by Order in writing made by the Minister.

(2) The customs value of imported goods is to be determined in accordance with clauses 3 to 9.

(3) The customs value of imported goods is their transaction value if the customs value can be determined in accordance with clauses 3 and 4.

(4) If the customs value of imported goods cannot be so determined, it must be determined in the following order and on the following basis:

(a) the transaction value of identical goods that meet the requirements set out in clause 5;

(b) the transaction value of similar goods that meet the requirements set out in clause 6;

(c) the deductive value of the imported goods as set out in clause 7;

(d) the computed value of the imported goods as set out in clause 8.

(5) The Director of Customs must reverse the order of consideration of the valuation basis provided for in subclauses (4) (c) and (d) upon receipt of a written request from the importer. The reversal must be confirmed in writing by the Director of Customs.

(6) If the customs value of imported goods, cannot be determined on the basis of any of the methods referred to in subclauses (4) (a) to (d), the customs value of the goods must be determined under clause 9.

## **3. Transaction value as primary basis of customs valuation**

(1) The customs value of imported goods is the transaction value, that is the price actually paid or payable for the goods when sold for export to Vanuatu adjusted in accordance with clause 4, if:

(a) there are no restrictions as to the disposition or use of the goods by the buyer other than restrictions which:

(i) are imposed by law; or

(ii) limit the geographical area in which the goods may be resold; or

(iii) do not substantially affect the value of the goods; and

(b) the sale or price is not subject to some condition or consideration for which a value cannot be determined with respect to the goods being valued; and

(c) no part of the proceeds of any subsequent resale, disposal or use of the goods by the buyer will accrue directly or indirectly to the seller, unless an appropriate adjustment can be made in accordance with clause 4; and

the buyer and the seller of the goods are not related to each other at the time the goods are sold for export or, if the buyer and the seller are related to each other at that time, the transaction value is acceptable for customs purposes under subclause (4).

If the buyer and seller are related, the Director of Customs must examine the circumstances surrounding the sale to determine whether the transaction value is acceptable or not.

If the Director of Customs is of the opinion that the relationship between the buyer and the seller of any goods influenced the price actually paid or payable for the goods, the Director must:

(a) inform the importer of the grounds on which his or her opinion was formed; and

(b) give the importer a reasonable opportunity to satisfy him or her that the relationship did not influence the price.

If the importer so requests, the communication of the grounds must be in writing.

(4) In a sale between related persons, the transaction value of the goods is acceptable and the goods are to be valued under subclause (1) if:

the relationship between the buyer and the seller did not influence the price of the goods; or

the importer of the goods demonstrates the transaction value of the goods closely approximates to one of the following occurring at or about the same time:

(i) the transaction value in sales to unrelated buyers of identical goods or similar goods for export to Vanuatu;

(ii) the deductive value of identical goods or similar goods;

(iii) the computed value of identical goods or similar goods.

(5) In applying the tests in subclause (4) (b), due account must be taken of:

demonstrated differences in commercial levels and quantity levels; and

the amounts referred to in clause 4; and

costs incurred by the seller in sales in which the seller and the buyer are not related, being costs that are not incurred by the seller in sales in which the seller and the buyer are related.

Without limiting subclause (4)(b), the factors that may be taken into consideration in determining whether one value closely approximates to another, include the following:

- (a) the nature of the goods being valued;
  - (b) the nature of the industry that produces the goods being valued;
  - (c) the season in which the goods being valued are imported;
- whether a difference in values is commercially significant.

The tests in subclause (4) (b) are to be used at the initiative of the importer and only for comparison purposes. Substitute values may not be established under subclause (4) (b).

#### **4. Adjustment of price actually paid or payable**

(1) In determining the customs value of imported goods under clause 3, the price actually paid or payable for the goods must be adjusted in accordance with subclauses (2) and (5).

(2) There is to be added to the price actually paid or payable for the imported goods the following amounts, to the extent that they are incurred by the buyer but are not included in the price actually paid or payable for the goods:

commissions and brokerage, except buying commissions;

the cost of containers, cartons, cases and coverings that are treated for customs purposes as being part of the goods;

the cost of packing the goods whether for labour or materials;

royalties and licence fees, including payments for patents, trademarks and copyright, relating to the goods being valued that the buyer must pay, directly or indirectly, as a condition of sale of the goods being valued (exclusive of charges for the right to reproduce the goods in Vanuatu);

the value of any part of the proceeds of any subsequent resale, disposal or use of the goods that accrues or is to accrue directly or indirectly to the seller;

the following costs and charges:

the cost of transportation of the goods to Vanuatu;

the loading, unloading and handling charges associated with the transportation of the goods to Vanuatu;

the cost of insurance of the goods to Vanuatu;

(g) the value (determined and apportioned in accordance with subclause (3)) of the following goods and services that are supplied directly or indirectly by the buyer free of charge, or at a reduced cost, for use in connection with the production and sale for export of the imported goods:

(i) material components, parts and other goods incorporated in the imported goods;

(ii) tools, dies, moulds and other goods used in the production of the imported goods;

(iii) materials consumed in the production of the imported goods;

engineering, development, art work, design work, plans and sketches undertaken outside Vanuatu and necessary for the production of the imported goods.

(3) The value of the goods and services in subclause (2) (g) (i), (ii), (iii) and (iv) is to be:

determined in a reasonable manner appropriate to the circumstances; and

apportioned to the imported goods in a reasonable manner appropriate to the circumstances and in accordance with generally accepted accounting principles.

(4) Without limiting subclause (3) (a):

if the importer acquires the goods or services at a given cost from a seller who is not related to the importer – the value of the goods or services is that cost; or

if the goods or services were produced by the importer or by a person related to the importer – the value of the goods or services is the cost of producing the goods or services; or

if the goods or services had previously been used by the importer, whether or not acquired or produced by such importer – the value of the goods or services would be the original cost of acquisition or production adjusted downward to reflect the prior use.

(5) There is to be deducted from the price actually paid or payable for the goods the following amounts, to the extent that they are included in the price actually paid or payable for the goods:

(a) any reasonable costs, charges or expenses for the construction, erection, assembly, maintenance or technical assistance provided in respect of the goods after they are imported;

(b) any reasonable costs, charges or expense incurred in respect of the transportation or insurance of the goods within Vanuatu;

(c) any other customs duties or taxes payable in Vanuatu by reason of the importation or sale of the goods;

if the costs, charges, expenses, duties or taxes are distinguished from the price actually paid or payable for the goods.

(6) Additions and deductions to the price actually paid or payable for imported goods must be made on the basis of sufficient information.

(7) No additions or deductions are to be made to the price actually paid or payable for imported goods in determining their customs value except as provided for by this clause.

(8) If there is not sufficient information to determine any of the amounts required to be added to, or deducted from, the price actually paid or payable, the transaction value of the goods being valued cannot be determined under clause 3.

## **5. Transaction value of identical goods as customs value**

(1) Subject to subclauses (2), (3) and (4), if the customs value of imported goods cannot be determined under clause 3, the customs value of the goods is the transaction value of identical goods if the identical goods were:

sold for export to Vanuatu; and

exported at the same or substantially the same time as the goods being valued; and

sold to a buyer:

at the same or substantially the same commercial level as the buyer of the goods being valued; and

in the same or substantially the same quantities as the goods being valued.

(2) If the identical goods were not sold under the conditions described in subclause (1) (c), other identical goods sold to a buyer under any of the following conditions are to be substituted:

(a) at the same or substantially the same commercial level but in different quantities;

(b) at a different commercial level but in the same or substantially the same quantities;

(c) at a different commercial level and in different quantities.

The transaction value of identical goods must be adjusted by adding to or deducting from that value, as the case may be, amounts to account for:

(a) if the costs and charges referred to in clause 4(2) (f) are included in the transaction value – significant differences in such costs and charges between the imported goods and the identical goods arising from differences in distances and modes of transport; and

(b) if the transaction value is in respect of identical goods sold under the conditions described in subclause (2) (a), (b) or (c) – differences in either or both of the following:

(i) the commercial levels of buyers of the identical goods and the imported goods;

(ii) the quantities in which the identical goods and the imported goods were sold.

Each of the amounts must be determined on the basis of sufficient information. However, if any such amount cannot be so determined, the customs value of the imported goods must not be determined on the basis of the transaction value of identical goods under this clause.

If, in applying this clause, more than one transaction value of identical goods is found, the

lowest such transaction value must be used to determine the customs value of the imported goods.

## **6. Transaction value of similar goods as customs value**

(1) If the customs value of imported goods cannot be determined under clause 5, the customs value of the goods is the transaction value of similar goods if the similar goods were:

sold for export to Vanuatu; and

exported at the same or at substantially the same time as the goods being valued; and

sold to a buyer:

(i) at the same or substantially the same commercial level as the buyer of the imported goods; and

in the same or substantially the same quantities as the goods being valued.

(2) Subclauses (2), (3) and (4) of clause 5 apply to this clause as if a reference in those subclauses to "identical goods" were a reference to "similar goods".

## **7. Deductive value as customs value**

(1) If the customs value of imported goods cannot be determined under clause 6, the customs value of the goods is the deductive value of the goods as provided for by subclause (2), (3) or (4), whichever applies.

(2) The deductive value of imported goods is the unit price at which the imported goods, or identical or similar goods, are sold in the greatest aggregate quantity if:

(a) the imported goods, or identical or similar goods, are sold in Vanuatu in the condition in which they were imported; and

(b) the sale occurs at or about the time of the importation of the goods being valued.

(3) The deductive value of imported goods is the unit price at which the imported goods, or identical or similar goods, are sold in the greatest aggregate quantity at the earliest date after the goods being valued are imported if:

the imported goods, or identical or similar goods, are sold in Vanuatu in the condition in which they were imported; and

the sale does not occur at or about the time of the importation of the goods being valued, but does occur within 90 days after that importation.

(4) If:

neither the imported goods nor identical goods nor similar goods are sold in Vanuatu in the condition in which they were imported; and

the imported goods, after being assembled, packaged or further processed in Vanuatu, are sold in Vanuatu within 90 days after their importation; and

the importer requests that this subclause be applied;

the deductive value of the imported goods is the unit price at which those goods are sold in the greatest aggregate quantity, due allowance being made for the value added by the assembling, packaging or further processing referred to in paragraph (b).

(5) For the purposes of subclauses (2), (3) and (4), the unit price at which imported goods, or identical or similar goods, are sold must be determined by ascertaining the unit price in respect of sales of the goods:

at the first commercial level after importation of the goods; and

to persons who are not related to the persons from whom they buy the goods;

if a sufficient number of such sales have been made to permit a determination of the unit price of the goods.

(6) Any sale in Vanuatu of imported goods to a person who supplies any of the goods or services referred to in clause 4(2) (g) directly or indirectly free of charge, or at a reduced cost, for use in connection with the production and sale for export of the imported goods must not be taken into account for the purposes of this clause.

(7) For the purpose of subclauses (2), (3) and (4), the unit price in respect of any goods being valued must be adjusted by deducting from the price an amount equal to the total of the following:

(a) an amount determined in accordance with subclause (8) for:

(i) the commission generally earned on a unit basis; or

the profit and general expenses, including all costs of marketing the goods, considered together as a whole that is generally reflected on a unit basis;

in connection with sales in Vanuatu of goods of the same class or kind;

(b) the reasonable costs, charges and expenses that are incurred in respect of the transportation and insurance of the goods within Vanuatu, and reasonable associated costs, charges and expenses, to the extent that an amount for such costs, charges and expenses is not deducted in respect of general expenses under paragraph (a);

(c) any customs duty or other taxes payable in Vanuatu in respect of the goods to the extent that an amount for such duties and taxes is not deducted in respect of general expenses under paragraph (a);

(d) if subclause (4) applies – the amount of value added to the goods that is attributable to the assembly, packaging or further processing in Vanuatu of the goods.

(8) The amount for commission or profit and general expenses referred to in subclause (7)(a) must be calculated on a percentage basis and determined on the basis of information prepared in a manner consistent with generally accepted accounting principles.

(9) The information must be supplied:

(a) by or on behalf of the importer of the goods being valued; or

(b) if the information supplied by or on behalf of the importer of the goods being valued is not sufficient information – by an examination of sales in Vanuatu of the narrowest group or range of goods of the same class or kind as the goods being valued from which sufficient information can be obtained.

(10) If there is not sufficient information to determine the amount referred to in subclause (7) (d) in respect of any goods being valued, the customs value of the goods must not be determined under subclause (4).

(11) For the purposes of subclause (3), the "earliest date" refers to the date by which sales of the imported goods or of identical or similar imported goods are made in sufficient quantity to establish the unit price.

## **8. Computed value as customs value**

(1) If the customs value of imported goods cannot be determined under clause 7, the customs value of the goods is the computed value of the goods.

(2) The computed value of the imported goods is the sum of:

the costs, charges and expenses, or the value, of:

materials employed in producing the imported goods; and

the production or other processing of the imported goods;

including the costs, charges and expenses mentioned in subclause (3), and determined in the manner specified in subclause (4); and

an amount for profit and general expenses, considered together as a whole, equal to that usually reflected in sales of goods of the same class or kind as the goods being valued which are made by producers in the country of exportation for export to Vanuatu, and determined under subclause (5).

(3) The costs, charges and expenses mentioned in subclause (2) (a) include the following:

(a) the costs referred to in clause 4(2) (b) and (c);

(b) the value of any goods and services referred to in clause 4(2)(g) which have been supplied directly or indirectly by the buyer for use in connection with the production of the imported goods;

(c) the value of engineering, development, artwork, design work, plans and sketches that were undertaken in Vanuatu to the extent that such elements are charged to the producer of the goods.

(4) The costs, charges and expenses referred to in subclause (2) (a) are to be determined on the basis of:

the commercial accounts of the producer of the goods being valued; or

any other sufficient information relating to the production of the goods being valued;

supplied by or on behalf of the producer of the goods and prepared in a manner consistent with generally accepted accounting principles of the country of production of the goods being valued.

(5) The amount of profit and general expenses referred to in subclause (2)(b) must be calculated on a percentage basis and determined on the basis of information prepared in a manner consistent with generally acceptable accounting principles of the country of production of the goods being valued.

(6) The information must be supplied:

(a) by or on behalf of the producer of the goods being valued; or

(b) if the information supplied by or on behalf of the producer of the goods being valued is not sufficient information – by an examination of sales for export to Vanuatu of the narrowest group or range of goods of the same class or kind from which sufficient information can be obtained.

(7) For the purposes of this clause, "general expenses" means the direct and indirect costs, charges and expenses of producing goods for export other than the costs, charges and expenses referred to in subclause (2)(a).

## **9. Residual value**

(1) If the customs value of imported goods cannot be determined under clause 8, the customs value must be determined:

(a) on information available in Vanuatu; and

(b) on the basis of the value derived from the methods of valuation set out in clauses 3 to 8 interpreted in a flexible manner and reasonably adjusted to the extent necessary to arrive at the customs value of the goods.

(2) However, a customs value must not be determined on the basis of:

(a) the selling price in Vanuatu of goods produced in Vanuatu; or

(b) a system which provides for the acceptance for customs purposes of the higher of 2 alternative values; or

(c) the price of goods on the domestic market of the country of exportation; or

(d) the cost of production other than computed values that have been determined for identical or similar goods in accordance with clause 7; or

(e) the price of goods for export to a country other than Vanuatu; or

(f) minimum customs values; or

(g) arbitrary or fictitious values.

## **10. Appeal rights**

(1) At any time after the making of a determination by the Director of Customs in relation to

any imported goods, the Director of Customs may review the determination.

(2) The importer of any goods may, at any time after the making of a determination by the Director of Customs in relation to the goods, request the Director of Customs to review the determination.

(3) If, as a result of a review under subclause (1) or (2), the Director of Customs is satisfied that the determination is:

inconsistent with this Schedule; or

incorrect for any other reason;

the Director of Customs must amend the determination, and import duty is payable in accordance with that amended determination.

If the importer of the goods is not satisfied with a decision of the Director of Customs under subclause (3) in relation to a determination, the importer may apply to the Supreme Court for a review of the original determination or the amended determination, as the case requires.

The Supreme Court may affirm, vary or revoke the original determination or the amended determination, as the case requires.

## **11. Supply of information**

Subject to clause 12, upon the written request by the importer of any goods, the Director of Customs must give written notice to the importer:

- (a) of the customs value of the goods; and
- (b) the basis of the determination of that value; and
- (c) the provisions of this Schedule that apply to the goods.

## **12. Confidential information**

(1) This clause applies to information that:

- (a) is by its nature confidential; or
- (b) has been provided to the Director of Customs by any government or person on a confidential basis for the purpose of determining the customs value of any goods.

(2) The information must not be disclosed to any other government or person without the specific authority of the government or person who provided the information, except to extent that it may be required to be disclosed in any legal proceedings arising out of a determination made under this Schedule.

## **13. Foreign currency conversion**

(1) If the conversion of foreign currency into the currency of Vanuatu is necessary to determine the customs value of imported goods, the rate of exchange to be used:

- a) is the rate duly published by the competent authority in Vanuatu; and

b) must reflect as effectively as possible, in respect of the period covered by each such document of publication, the current value of such currency in commercial transactions in terms of the currency of Vanuatu.

(2) The rate of exchange to be used is the rate referred to in subclause (1) that is in effect at the time when the imported goods are declared for customs purposes.

(3) The Director of Customs must notify the rate of exchange in such manner as he or she determines.

#### **14. Withdrawal of goods**

(1) If, in the course of determining the customs value of imported goods, it becomes necessary to delay the final determination of the customs value, the importer of the goods may withdraw the goods from the control of the Director of Customs.
