

Electricité Du Cambodge
Department of Rural Electrification Fund

Report
on
Activities of the Department of
Rural Electrification Fund
for the Year 2014

Compiled by Department of the Rural Electrification Fund
2015

Preface

This report on activities of the Department of Rural Electrification Fund for the Year 2014 issued in 2015 is the report compiled from the data and information related to Strategy and Plan for Development of Rural Electrification, Policy on Renewable Energy of the Royal Government of Cambodia (RGC), the establishment of Rural Electrification Fund, mission, activities, and the achievements of Rural Electrification Fund. This report is aimed for dissemination to the Royal Government of Cambodia, donors, investors and public desirous to know about the activities of the Department of Rural Electrification Fund in accelerating of rural electrification development in the Kingdom of Cambodia.

This report is compiled, in Khmer and English.

Department of Rural Electrification Fund plans to publish the report annually on its achievements so that the data and relevant information on activities of the Department of Rural Electrification Fund is updated regularly to reflect the actual situation. Any comments or suggestions from the Royal Government of Cambodia, donors, investors or public are welcome and will be considered by the Department of Rural Electrification Fund to publish more useful reports in future.

Department of Rural Electrification Fund expects that this report will be a valuable document for the information on activities of the Department of Rural Electrification Fund.

**Royal Government of Cambodia Delegate
in Charge of Managing Electricité du Cambodge**

Chapter 1

Strategy and Plan for Development of Rural Electrification and Policy on Renewable Energy of the Royal Government of Cambodia

1.1 Strategy and Plan for Development of Rural Electrification

The Royal Government of Cambodia (RGC), in its pursuit to reduce poverty, improve the standard of living and foster economic development of the rural areas, takes cognizance of the need to meet the basic infrastructure requirements of its marginalized rural people. Creating access to reliable electricity services at an affordable cost in rural areas is thus an integral part of the governmental agenda of economic development and social uplift.

To implement the above agenda, RGC through the Ministry of Mines and Energy (MME), which is the expertise ministry, has set a two-step target in rural electrification:

- (i) by the year 2020, all the villages of the Kingdom of Cambodia will have electricity of some type; and
- (ii) by the year 2030, at least 70% of households will have access to grid-quality electricity.

The strategy outlined to achieve the above target consists of (i) - Electricité du Cambodge to undertake expansion of the High Voltage (HV) grid system to more provinces and Medium Voltage (MV) supply into rural areas, (ii) - the expansion of the area of supply of the licensees supplying in rural areas, and (iii) - the private investors in power sector to provide power supply to new areas.

1.2 Policy on Renewable Energy

The RGC has issued six policy statements embracing the rural electrification by renewable energy sources as follows¹:

1. Striving to provide reliable electricity service that is safe and resulted in minimum negative impacts on the environment at a cost acceptable to the rural communities.
2. Offering legal framework, effective directions, a variety of encouragement, and fostering private sector participation to supply electricity services by using renewable energy to the rural communities.
3. Acting as facilitator in the market by using a variety of encouragement apparatus conducive to electricity service that is equitable, reliable, and safe, with minimum negative impacts on the environment at an affordable price to the rural communities.
4. Fostering the generation, transmission, and distribution of electricity with renewable energy technologies by setting electricity rates that are in accordance to the principle of Cambodia's electricity law.
5. Promoting the electricity system that uses the cheapest renewable energy system for the rural communities; research, trial and error, and developing model are ones of the Government's duties related to grid extension and off grid extension.
6. Guarantying to provide sufficient fund, appropriate mechanism, and various training to allow participation in the rural electrification effort by financially disadvantage people.

¹ Policy on Rural Electrification by Renewable Energy, January 2007.

Chapter 2

Information on Department of Rural Electrification Fund

2.1 Establishment of Department of Rural Electrification Fund

RGC issued the Royal Decree No. NS/RKT/1204/048 dated 4 December 2004 on the establishment of the Rural Electrification Fund of the Kingdom of Cambodia to accelerate the development of rural electrification. In the initial year, Rural Electrification Fund utilized the funds provided by the World Bank under the Rural Electrification and Transmission Project (RETP) and RGC's counterpart fund. After RETP was closed on 31st January 2012 and funds were not made available to meet the operation expenses of Rural Electrification Fund, then, on 22nd August 2012, RGC issued a new Royal Decree No. NS/RKT/0812/734, amending some articles of the old Royal Decree on formation of Rural Electrification Fund, to integrate Rural Electrification Fund with Electricité du Cambodge (EDC) so that Rural Electrification Fund can continue to perform its works independently on Cambodian funding and still also receive grant and donations from external funding to assist in development of rural electrification in Cambodia. In accordance with this new Royal Decree, EDC has established a new department² known as **"Department of Rural Electrification Fund"** herein after called **"REF"**.

This is a big step of the RGC to attract and encourage the private sector to invest in electric power infrastructure in rural areas in order to accelerate the development of electricity in rural areas so that more poor people in the rural areas can access electricity for lighting, commercial use, handicraft and other purposes for improving their standard of living and for the general interest of the society.

2.2 Organisation Structure of REF

REF operates in accordance with the Statute of EDC and functions as a non-profit organization and has separate account.

2.3 Address of REF

REF's office is located at Building # 205, National road No. 5, Sangkat Kilometer No. 6, Khan Russeykeo, Phnom Penh, Cambodia. REF's website is www.ref.gov.kh.

² Decision No. 0898 dated September 12, 2012 on the integration of REF institution in the management structure and organization of EDC.

REF has also its own library for public who wishes to understand about REF's activities, report and the development of rural electrification in the Kingdom of Cambodia.

2.4 The Sources of Fund for REF

The sources of fund for REF are as follows:

1. Social budget package provided in electricity tariff of EDC and other donations of EDC, if any.
2. Donations and grants whose sources and terms are acceptable to the Ministry of Mines and Energy (MME) and the Ministry of Economy and Finance (MEF).
3. Other sources from RGC.

2.5 REF's Funding

REF's funding is from EDC. In 2014, EDC has provided fund of \$6 million for the operation of REF and implementation of three rural electrification development programs consisting of (i) - Program for Power to the Poor (P2P), (ii) - Program for Solar Home System (SHS), and (iii) - Program for Providing Assistance to Develop Electricity Infrastructure in Rural Areas.

Chapter 3

Information on Objectives, Mission and Program of REF for the Development of Rural Electrification

3.1 Objectives of REF

The objectives of REF are as follows³:

1. To promote equitable rural electrification coverage by facilitating the population's access to electricity at affordable price for economic, social and household uses, thus contributing to poverty reduction.
2. To promote and encourage private sector to participate in providing sustainable rural electrification services; in particular the exploitation of and economic application of technically and commercially well proven new and renewable energy technologies.

3.2 Missions of REF

REF has the following missions:

1. Promoting equitable rural electrification coverage by facilitating the population's access to electricity at affordable price for economic, social and household uses.
2. Providing support for the preparation and implementation of rural electrification projects.
3. Promoting and facilitating the poor households in rural areas to have access to electricity for their houses from grid supply by providing interest free loan.
4. Promoting and facilitating the remote rural household, which may not have access to the electricity network for a long period, access electricity through Solar Home System.
5. Promoting and facilitating the private electricity supplier in rural areas having legal license to access fund for investing on expansion of electricity supply infrastructure to fully cover its authorized distribution area in order to allow all rural households have access to electricity for use.
6. Promoting the use of well proven, technically and commercially viable new and renewable energy technologies.

REF will use its resources to achieve the above missions depending on the conditions for which fund are made available by different sources.

3.3 Programs of REF for Development of Rural Electrification

In 2014, REF is implementing the following programs:

3.3.1 Power to the Poor (P2P) Program

The purpose of this program is to facilitate the poor households in rural areas to have access to electricity for their houses from grid supply by providing interest free loan to meet (i)- costs for the connection fees of the electricity supplier, (ii)- costs for deposit to be deposited with the electricity supplier, (iii)- costs for purchase of materials and labor for the installation of wires

³ Provision 3 of the Royal Decree No NS/RKT/1204/048 dated 4 December 2004 on the establishment of REF.

from the connection point to its house, and (iv)- costs for purchase of materials and labor for the installation of in-house wiring.

3.3.2 Solar Home System (SHS) Program

The purpose of this program is to facilitate the remote rural household, which may not have access to the electricity network for a long period, access electricity through SHS.

3.3.3 Program for Providing Assistance to Improve Existing and Develop Electricity Infrastructure in Rural Areas

The purpose of this program is to facilitate the private electricity supplier in rural areas having legal license to access fund for investing on expansion of electricity supply infrastructure to fully cover its authorized distribution area in order to allow all rural households have access to electricity for use.

3.4 Eligibility criteria for implementation of REF Programs

3.4.1 Eligibility criteria for P2P Program

Eligibility criteria for Rural Electricity Enterprises (REEs) and rural HH are as follows:

A. Eligibility Criteria for REEs

Eligibility criteria for REEs are as follows:

- Having license for providing electric power from Electricity Authority of Cambodia (EAC) and license term is at least 5 years.
- The supply to the rural area is from the grid supply for a period of at least one year.
- Maintaining correct accounting statement to show the viability of their operation.
- Responsible to collect back the payment in installments from the rural HH and transfer to REF's account on time.
- Responsible to any losses caused by non-payment by rural HH except if REF agrees to eliminate the debt.
- Agree to execute contract: (i) - Contract for Soft Loan from REF for Connection of Electricity Supply, (ii) - Contract between REF and REE for utilizing soft loan under P2P Program, (iii) - Principles for implementation of P2P Program by providing soft loan to poor households in rural areas for connection of electricity supply, and other concerning documents under P2P Program.

B. Eligibility Criteria for rural HH

Eligibility Criteria for rural HH are as follows:

- Living in the existing electrified rural areas.
- Household not yet connected to the supply system.
- Have a stable house for safety of electrification.
- All female -headed households and households with disabled members;
- Agree to payback in monthly installment within maximum period of 36 months.

- The Amount of this loan shall not exceed 480,000 Riels per household.
- Agree to execute contract: (i) - Contract for Soft Loan from REF for Connection of Electricity Supply, (ii) - Principles for implementation of P2P Program by providing soft loan to poor households in rural areas for connection of electricity supply, and other concerning documents under P2P Program.

3.4.2 Eligibility criteria for SHS Program

Eligibility criteria for SHS are as follows:

1. The remote rural area, which may not have access to the electricity network for a long period and the area which may not have access to the electricity network for at least 5 years.
2. Sale and installation at rural households and pagoda in rural area throughout the Kingdom of Cambodia. One HH and one pagoda are eligible for one SHS.
3. Provide a subsidy of USD 100 per SHS to rural households, as assistance to reduce the cost of the SHS and the cost of installation.
4. The purchaser agrees to repay the remaining cost without interest of the SHS (remaining cost is the cost after deducting the subsidy of USD 100 per SHS) in installments to REF within the period of 48 months. The pagoda agrees to pay the full remaining cost after deducting the subsidy at the time of installation. After the purchaser has paid the remaining cost in full, the SHS will become the property of the purchaser.
5. The household can choose, the pay back of the remaining cost by any one of the 3 options: option (1) - payoff the remaining cost at the time of installation or option (2) - payment of half-yearly installments in the beginning of each half-year within a period of 4 years or option (3) - every two months instalments within a period of 4 years.
6. No down payment. The first installment is to be paid on the date of commissioning of the SHS. Subsequent installments of payment are to be paid until the amount is paid back in full. Payments are to be made to the seller or its authorized representative.
7. No interest is chargeable for payment in installments.
8. The transportation, installation, collection of repayment and maintenance of the SHS is through a local private firm.
9. The installation and maintenance fees are born by REF.
10. The purchaser shall agree to execute the contract and other legal documents with REF.

3.4.3 Eligibility criteria for Program for Providing Assistance to Improve Existing and Develop Electricity Infrastructure in Rural Areas

The criterion for implementation of this program is formulated for three different types of area considering the density of population as follows:

Area No. 1 - Area with high density of population having economic efficiency

REF will provide the guarantee on loan borrowed by electricity supplier in rural areas from the local banks for investment on expansion of electricity infrastructure in rural areas to fully cover its authorized distribution area.

Eligibility criteria for area No. 1 is as follows:

1. Electricity supplier shall have valid license for providing electricity service issued by Electricity Authority of Cambodia (EAC) and the term of the license shall be for at least 5 years from the date of application for loan.
2. Electricity supplier shall have proper accounting record of its electricity business.
3. This loan will be only for investment in electricity supply infrastructure in rural areas connected from the national grid or supplying power through isolated system.
4. Electricity supplier can use this loan for investment on Medium Voltage (MV) and Low Voltage (LV) electricity supply infrastructure in its authorized licensed area, both for the development of new electricity infrastructure and for improving the existing electricity infrastructure in its authorized licensed area.
5. Electricity supplier shall agree to execute a contract and other legal documents with EDC for the guarantee on the loan from bank and with bank for getting the loan.
6. Electricity supplier shall obtain no-objection from EAC on the conditions, including the transfer of license to EDC in case the borrower could not pay back on time as agreed with the bank, in the guarantee contract for loan which the electricity supplier shall execute with EDC.
7. Source of funds for this implementation is from local banks.

Area No. 2: Area with medium density of population, where doing electricity business may not be profitable if the electricity supplier has to pay interest on the investment capital

REF will provide the interest free assistance for investment on electricity infrastructure in rural areas.

Eligibility criteria for area No. 2 are as follows:

1. Electricity supplier shall have valid license for providing electricity service issued by Electricity Authority of Cambodia (EAC) and the term of the license shall be for at least 5 years from the date of application for loan.
2. Electricity supplier shall have proper accounting record of its electricity business.
3. This budget is for investment on electricity infrastructure in rural areas connected from the national grid only.
4. Electricity supplier can use this loan for investment on Medium Voltage (MV) and Low Voltage (LV) electricity supply infrastructure in its authorized licensed area, both for the development of new electricity infrastructure and for improving the existing electricity infrastructure in its authorized licensed area.
5. Electricity supplier prepares development plan with cost and gets approval for investment from EAC.
6. REF examines the application and sanctions the appropriate amount of interest free assistance to be provided in instalments and sign contract for disbursement and repayment. Electricity supplier shall obtain no-objection from EAC on the conditions, including the transfer of license to EDC in

- case the borrower could not pay back on time as agreed with REF, in the contract for interest free assistance.
7. Electricity supplier applies to REF for disbursement of interest free assistance along with progress report. REF verifies the progress and makes disbursements in installment depending on the work progress. REF will acknowledge the repayment of the full amount of the interest free assistance when the full amount of interest free assistance is repaid back in installment by the electricity supplier.
 8. The interest free assistance provided under this scheme will be interest free.
 9. The amount of the interest free assistance will not exceed USD 150,000 (one hundred fifty thousand) per project. The electricity supplier may request for other new project for consideration of REF when required.
 10. In the case of existing electricity supplier, the amount of the interest free assistance will not exceed 50% of the cost of the existing electricity infrastructure of the electricity supplier as assessed by EAC. In the case of new electricity supplier, the amount of the interest free assistance will not exceed 50% of the cost of the proposed electricity infrastructure of the electricity supplier as assessed by EAC.
 11. Electricity supplier shall agree to execute the contract and other legal documents with REF.
 12. Source of funds is from EDC.

Area No. 3: Area with low density of population, where doing electricity business is not viable unless part of the infrastructure cost is provided as grant

REF will provide part of the infrastructure cost as grant and part of the cost as interest free assistance for investment on electricity infrastructure in rural areas.

Eligibility criteria for area No. 3 are as follows:

1. Electricity supplier shall have valid license for providing electricity service issued by Electricity Authority of Cambodia (EAC) and the term of the license shall be for at least 5 years from the date of application for loan.
2. Electricity supplier shall have proper accounting record of its electricity business.
3. This budget assistance is for investment on MV and LV electricity infrastructure in rural areas connected from the national grid and which is evaluated by REF as area eligible for grant.
4. Electricity supplier can invest the amount of this budget assistance for the development of new electricity infrastructure in rural areas.
5. Electricity supplier shall prepare development plan with cost and get approval for investment from EAC.
6. REF examines the application and sanctions the appropriate amount of grant and interest free assistance to be provided in installments and sign contract for disbursement and repayment. Electricity supplier shall obtain no-objection from EAC on the conditions, including the transfer of license to EDC in case the borrower could not pay back on time as agreed with REF, in the contract for grant and interest free assistance.
7. Electricity supplier applies to REF for disbursement of budget assistance along with progress report. REF verifies the work progress and makes disbursements in installment depending on the work progress. REF will acknowledge the repayment of the full amount of the interest free assistance

when the full amount of interest free assistance is repaid back by the electricity supplier. The amount, provided as grant in this budget assistance by REF, is not required to be paid back.

8. The interest free assistance provided under this scheme will be interest free.
9. The amount of the interest free assistance and grant will not exceed USD 150,000 (one hundred fifty thousand) per project. The electricity supplier may request for other new project for consideration of REF when required.
10. In the case of existing licensee, the amount of the grant will not exceed 30% of the cost of the project and the amount of the interest free assistance will not exceed 50% of the cost of the existing electricity infrastructure of the electricity supplier as assessed by EAC. In the case of new electricity supplier, the amount of the grant will not exceed 30% of the price of the project and the amount of the interest free assistance will not exceed 50% of the price of the proposed electricity infrastructure of the electricity supplier as assessed by EAC.
11. Electricity supplier shall agree to execute the contract and other legal documents with REF.
12. Source of funds is from EDC.

Chapter 4
Information on the progress/ achievements and analysis of each
Program implemented by REF

4.1 Program for Power to the Poor (P2P)

4.1.1 Target number and achievement under P2P Program

In 2014, 9 contracts with 10 licensees (one licensee has executed 2 contracts) for providing new connections in rural areas under P2P program have been executed by REF. The total target number under these 9 contracts is connection to 2,176 rural households (HH). Provincewise summary information on execution of contracts under P2P Program in 2014 is given in **Annex 1**.

Out of the 10 contracts, for some contracts 100% target was achieved within the contract period, whereas for some contracts part target was achieved within the contract period and such contracts have been terminated on the expiration of the contracts period and some contracts are ongoing as the contracts period was not over on 31st December 2014. Provincewise summary information on contracted target number of rural households to be connected to supply system, number of rural household connected to supply system and target number of new connections, not achieved and contract terminated under P2P Program in 2014 is given in **Table 1** below.

Table 1: Provincewise summary information on contracted target number of rural households to be connected to supply system, number of rural household connected to supply system and target number of new connections, not achieved and contract terminated under P2P Program in 2014

No.	Province	Contracted target number of rural HH to be connected to supply system, (HH)	Number of rural HH connected to supply system, (HH)	Target number of new connections, not achieved and contract terminated (HH)
1	Banteay Meanchey	103	395	-
2	Kampong Cham	550	250	300
3	Kratie	158	-	158
4	Prey Veng	1,187	1,075	112
5	Pursat	178	76	102
6	Takeo	-	17	-
	Total	2,176	1,813	672

Provincewise summary information on contracted target number of rural households to be connected to supply system, number of rural household connected to supply system and present position under P2P Program in 2014 is given in **Annex 2**.

In 2014, 1,813 rural consumers have got direct benefit of this program. According to Cambodia Inter-Censal Population Survey 2013 Final Report, the average household size in rural area is 4.6 persons. Hence the number of population directly benefited from this program is 8,340 persons. P2P program has provided the much needed impetus to REEs by increasing the number of consumers (rural household) and hence increasing the sell of electricity.

Provincewise total number of villages and villages in which P2P program was implemented in 2014 is given in **Table 2** below.

Table 2: Provincewise total number of villages and villages in which P2P program was implemented in 2014

No.	Province	Total number of villages	Number of villages in which P2P program was implemented
1	Banteay Meanchey	633	8
2	Kampong Cham	1,758	22
3	Kratie	250	12
4	Prey Veng	1,137	43
5	Pursat	501	20
Total		4,269	105

List of villages covered by P2P Program in 2014 is given in **Annex 3**.

Map showing the provinces in which P2P Program is implemented in 2014 is given in **Annex 4**.

4.1.2 Site inspection activities on implementation of P2P Program

To ensure that the implementation of P2P program is implemented in a transparent and proper manner, REF staff verified the new connection to rural consumers under P2P program for all licensees who implemented this program. Some physical activities of new connection verification are shown pictorially below.

Mr. York Savong (Project 2) license No. 125L for providing electricity service at Some parts of some parts of Krakor and Kandeang District, Pursat Province

4.2 Program for Solar Home System (SHS)

4.2.1 Program for sale and installation of 4,000 SHS-50W

In 2014, REF has sold and installed 4,000 SHS-50W to rural households (HHs) in remote areas. To facilitate the purchasers and ensure that the SHS installed at rural HHs, operates well and to collect the payback amount in instalments from the purchasers, Electricité du Cambodge (EDC) has executed a contract with B.N.P. Power Green (Cambodia) Co., Ltd for providing services of transportation, installation, collection of payback in installment and maintenance of 4,000 systems.

Provincewise information on number of SHS installed to rural HHs in 2014 is given in **Table 3** below.

Table 3: Provincewise information on number of SHS installed to rural HHs in 2014

No.	Province	Number of SHS installed
1	Kampong Thom	1,092
2	Pursat	2,908
Total		4,000

4,000 rural HHs are directly benefited by this program (one SHS per HH). According to Cambodia Inter-Censal Population Survey 2013 Final Report, the average household size in rural area is 4.6 persons. Hence the number of population directly benefited from this program is 18,400 persons.

Provincewise total number of villages and villages which access electricity through SHS in 2014 is given in **Table 4** below.

Table 4: Provincewise total number of villages and villages which access electricity through SHS in 2014

No.	Province	Total number of villages	Number of villages access electricity through SHS
1	Kampong Thom	737	26
2	Pursat	501	51
Total			77

List of villages in which SHS have been installed in 2014 is given in **Annex 5**.

Map showing the provinces in which SHS have been installed in 2014 is given in **Annex 6**.

Some photos of rural households with 4,000 SHS-50Wp installation and Dissemination in 2014

4.2.2 Program for 6,000 SHS-50W and 2,000 SHS-5W

In 2014, EDC has executed a contract on 31 October 2014 with Richgrid Technology Co., Ltd and the Ministry of Economy and Finance (MEF) has approved and signed on this contract on 16

December 2014 for supply of 6,000 SHS-50W and 2,000 SHS-5W, totaling 8,000 SHS, to REF. The SHS are expected to be received in early 2015. 6,000 SHS-50W materials are for sale to and installation at remote rural households. Whereas, 2,000 SHS-5W materials are for donation to rural HHs at remote areas.

As more fund is available, EDC is processing to executed a additional contract with Richgrid Technology Co., Ltd for supply of 3,240 SHS-50W to REF. These 3,240 SHS-50W materials are also for sale to and installation at remote rural households.

To implemt this program, to facilitate the purchasers and ensure that the SHS installed to rural HHs, operates well and to collect the payback amount in instalments from the purchasers, EDC is processing procurement of a private firm for providing services of transportation, installation, collection of payback in installment and maintenance of 8,000 systems.

4.2.3 The challenges faced in the implementation of SHS program

The challenges faced in the implementation of SHS program are as follows:

- Purchaser requests to delay the payment due to not having money to repay.
- Purchaser can afford payment but unwilling to pay on the ground that another purchaser has not paid.
- Purchaser mishandles the SHS resulting in improper operation of the SHS and avoid payment on the ground that SHS is not operating.
- Purchaser migrates leaving behind very old or/and young person to look after the house who has no money for payment.
- Purchaser removes SHS unauthorizedly and take it to new in accessible place like farm, forest and mountain hence cannot be contacted to get payment.
- Purchaser go to the rice field by locking the house and their steal the system (some agree to pay and some disagree to pay the remaining cost of the system),
- Purchaser leave the house when the Operator arrives or on the way to collect the money.
- Purchaser take some excuse to delay the payment to another day.
- The SHS is damaged by fires or lightning etc. and the purchaser refuses to pay the balance instalments.

To resolve the challenges, REF has gone to the site for resolution through friendly mutual discussion basis.

Pictures of activities in resolution with the SHS purchaser, who have not paid back in Kampong Thom Province

As on 31st December 2014, in spite of the above challenges, the implementation of this program can be considered satisfactory.

4.3 Program for Providing Assistance to Improve Existing and Develop Electricity Infrastructure in Rural Areas

4.3.1 Target number and achievement under Program for Providing Assistance to Improve Existing and Develop Electricity Infrastructure in Rural Areas

In 2014, REF has executed 72 contracts for providing assistance to improve existing and develop electricity infrastructure in rural areas with 66 licensees (6 licensees have executed 2 contracts each). Provincewise information on licensees who have executed contracts with REF for getting assistance to improve existing and develop electricity infrastructure in rural areas in 2014 is given in **Annex 7**.

Out of the 72 contracts, for some contracts 100% target was achieved within the contract period, whereas for some contracts part target was achieved within the contract period and such contracts have been terminated on the expiration of the contracts period and some contracts are ongoing as the contracts period was not over on 31st December 2014. Provincewise information on contracted target length of network, constructed length of network under Program for Providing Assistance to Improve Existing and Develop Electricity Infrastructure in Rural Areas in 2014 is given in **Table 5** below.

Table 5: Provincewise information on contracted target length of network, constructed length of network under Program for Providing Assistance to Improve Existing and Develop Electricity Infrastructure in Rural Areas in 2014

No.	Province	Contracted target length of network, (km)		Constructed length of network, (km) ⁴	
		LV	MV	LV	MV
1	Banteay Meanchey	16.8	7.00	36.33	7.00
2	Battambang	115.38	48.81	119.88	48.81
3	Kampong Cham	127.20	27.00	127.20	27.00

14	Preah Sihanouk	19.43	-	24.43	16.50
15	Svay Rieng	20.00	-	20.00	-
16	Takeo	108.11	13.70	125.01	13.70
		1,023.04	135.45	1,131.28	151.95
Total		1,158.49		1,283.23	

Note: * Licensees provide electricity in two provinces, but the development of electricity infrastructures is not in these provinces.

⁴ This constructed length of network includes the contracts signed in 2013 but the construction of network is completed in 2014.

Provincewise summary information on contracted target length of network, constructed length of network and present position under Program for Providing Assistance to Improve Existing and Develop Electricity Infrastructure in Rural Areas in 2014 is given in **Annex 8**.

In 2014, 66 licensees have been directly benefited by this program. This program has provided the much needed impetus to REEs to expand electricity supply to cover fully and quickly its authorized license area so that more rural household can access grid quality electricity supply from the REEs.

Provincewise total number of villages and number of villages electrified under Program for Providing Assistance to Improve Existing and Develop Electricity Infrastructure in Rural Areas in 2014 is given in **Table 6** below.

Table 6: Provincewise total number of villages and number of villages electrified under Program for Providing Assistance to Improve Existing and Develop Electricity Infrastructure in Rural Areas in 2014

No.	Province	Total number of villages	Number of villages access electricity

List of villages covered by Program for Providing Assistance to Improve Existing and Develop Electricity Infrastructure in Rural Areas in 2014 is given in **Annex 9**.

Map showing the provinces for which REF provides assistance to improve existing and develop electricity infrastructure in rural areas in 2014 is given in **Annex 10**.

4.3.2 Site inspection activities on implementation of Program for Providing Assistance to Improve Existing and Develop Electricity Infrastructure in Rural Areas

To ensure that the implementation of Program for Providing Assistance to Improve Existing and Develop Electricity Infrastructure in Rural Areas is implemented in a transparent and proper manner, REF staff verified the construction of networks for all licensees who implemented this program. Some physical activities of new network construction verification are shown pictorially below.

Mr. Lim Sisophon having license No. 188L for providing electricity service at some parts of Samraong and Tramkork District, Takeo Province
